

I support RM-10867, because it is the right thing to do. I suppose it should have been drafted, submitted, and adopted by the FCC over a generation ago, but it wasn't. The provisions in it are honest, true, and most importantly, fair to both new hams, old hams, and those who think they might want to become hams. This proposition probably would not have to be debated, and CW would not have to have become a political volleyball in the hands of those who really aren't interested in anything but their own selfish needs: it's just another mode of operation that separates, isolates, and deprives folks of their innate ability to use their brains for other purposes. Please change the rulings once and for all, and let's all get on with life. Thank you for your efforts. God bless America.
